GULF COAST RESEARCH LABORATORY

THE UNIVERSITY OF SOUTHERN MISSISSIPPI

*NOTE: Only astronomical influences, namely the moon and sun, were considered in development of these water level tables. The heights derived using the Tide Tables must be applied to chart soundings to obtain water depths for a specific location. In all cases, this tidal data is based on the chart datum of soundings. The chart datum in U.S. waters is generally Mean Lower Low Water (MLLW) -- that is, charted depths are usually near the lowest average depth to be expected when meteorological conditions are normal.

Bear in mind that local phenomena can greatly alter water depths. In some places, strong winds can affect tidal depths. Hurricanes can push surges ahead of them more than 10 feet high. Harbors at river mouths often experience seasonal fluctuations in depths, according to the amount of rainfall in the river's watershed.

Abbreviations and Symbols used in these Tables:

H=High Tide, L=Low Tide, MHHW=Mean Higher High Water, ft=feet,
MR=Moon Rise, MS=Moon Set, SR=Sun Rise, SS=Sun Set,
CST=Central Standard Time, CDT=Central Daylight Saving Time, a=am, p=pm,
●=New Moon, ◐=First Quarter Moon, ○=Full Moon, ◑=Last Quarter Moon

THE UNIVERSITY OF SOUTHERN MISSISSIPPI

GULF COAST RESEARCH LABORATORY

salutes

**Pascagoula
Refinery**

*for supporting production of the
2010 Mississippi Tide, Sun, Moon Tables*

The mission of the Gulf Coast Research Laboratory, Mississippi's marine laboratory, is scientific discovery related to coastal and marine resources, development of new marine technologies, and the education of future scientists and citizens.
